ABOUT ME

Data and automation professional with 4+ years of experience in digital risk, Trust & Safety, and business operations, now focused on AI Engineering and data-driven automation. Experienced in investigative analysis, risk pattern recognition, and building AI-enabled workflows to reduce manual effort and improve operational efficiency. Skilled in Python, SQL, React.js, and PostgreSQL, with hands-on experience in LLM integration, workflow automation, and applied machine learning through academic and project work. Interested in FinTech, RegTech, trading platforms, and financial crime prevention, with a strong focus on scalable AI systems, automation, and data products.

CORE COMPETENCIES

- | | | |
|---------------------------------------|-------------------------------------|--|
| ● AI Automation & Agentic Workflows | ● Data Engineering & Transformation | ● AI Deployment & Ops |
| ● LLM Integration & Tool Calling | ● ETL/ELT Pipeline Development | ● API Integration & System Integration |
| ● Workflow Orchestration & Automation | ● AI Application Development | ● Monitoring, Logging & Reliability |

TECHNICAL SKILLS & LANGUAGES

- **Programming & Scripting:** Python, R, SQL, JavaScript, HTML, CSS
- **AI / Machine Learning:** Regression, classification, clustering; TensorFlow (CNN, LSTM, Autoencoder); NLP and Transformer models (BERT, DistilBERT, RoBERTa)
- **AI / Agent Automation:** Claude/LLM/RLM integration, tool calling, workflow automation, API integration, webhooks
- **Web Development:** Node.js, React.js, Next.js, REST APIs
- **Databases & Storage:** Supabase (PostgreSQL), Byterover (vector retrieval), GitHub (version control), SQLite
- **Development & Productivity Tools:** GitHub, GitLab, Microsoft Office, Google Workspace, Trello, Slack
- **Languages:** Indonesian (Native), English (Fluent), Malaysian (Fluent)

EDUCATION

Asia Pacific University, Malaysia & De Montfort University, UK <i>MSc in Data Science and Business Analytics - Dual Degree Program</i> Specialization: Data Engineer	Jun 2024 – Sep 2025
---	----------------------------

PROFESSIONAL EXPERIENCE

- | | |
|---|----------------------------|
| Data Analyst, AXI <ul style="list-style-type: none">● Analyze business and operational data to support decision-making.● Build dashboards and KPI reports for performance tracking.● Clean and validate data to ensure reporting accuracy.● Work with teams to understand data needs and deliver insights.● Identify trends, issues, and improvement opportunities through data. | Present |
| AI Engineer Intern, Ex Venture <ul style="list-style-type: none">● Engineered LLM-powered automation workflows using Claude, OpenClaw, and custom AI configurations for internal business use cases.● Built and tested AI agents for automated email handling, appointment scheduling, and multi-step workflow execution.● Integrated AI assistants with platforms such as email, LinkedIn, WhatsApp, and other social channels to support automated interactions.● Developed web scraping and data automation pipelines to collect, process, and structure data for AI-driven applications.● Contributed to AI-powered HR automation workflows, including candidate screening, internal assistant support, and workflow optimization. | Jan 2026 - May 2026 |

- Data Analyst Intern, RevoU x Telekom**

Sep 2024 – Jan 2025
- Queried, cleaned, and prepared marketing and transactional datasets in Google BigQuery using SQL for analysis and reporting.
 - Engineered RFM, timing, and product-behavior features and applied K-Means clustering for customer segmentation to support ROI-focused targeting.
 - Analyzed campaign KPIs and translated findings into actionable insights to improve campaign performance.
 - Built interactive Tableau dashboards to visualize performance trends and customer segment behavior for stakeholders.
 - Automated data preparation and reporting workflows using Python and SQL, improving consistency and reducing manual effort.

- Business Operation Associate - Trust & Safety, Accenture**

May 2019 – Apr 2023
- Reviewed and enforced risk-based policies across 500+ daily cases involving financial scams and impersonation, developing strong pattern recognition skills for fraud detection.
 - Optimized triaging workflows, improving case handling efficiency and consistently exceeding SLA targets in a high-volume environment.
 - Reduced repeat policy violations by implementing proactive compliance checks and operational safeguards.
 - Analyzed risk trends and escalated complex cases to leadership, supporting standardized policy decisions and improved analyst consistency.
 - Maintained high accuracy while handling sensitive data in compliance with strict privacy and data protection standards.

- Junior Intern Accountant, Yes Accountant**

Mar 2018 – May 2018
- Reconciled daily bank transactions against the general ledger, identifying and resolving discrepancies to improve accuracy.
 - Supported audit readiness by reviewing financial statements and ensuring documentation completeness.
 - Assisted month-end closing activities through account reconciliation and reporting support.
 - Researched updated accounting standards and applied insights to daily accounting tasks.

Project Experience

- Multi-Series Deep Learning Models for Stock Forecasting, APU**

Jan 2024 – Jul 2025
- Developed deep learning models for financial time-series forecasting, simulating quantitative analysis in trading and risk modeling.
 - Implemented and evaluated LSTM, CNN-LSTM, and Tab Transformer architectures to predict NVIDIA stock trends using multi-series market data.
 - Engineered datasets with a 60x35 input structure, integrating technical indicators and correlated market signals.
 - Evaluated model performance using RMSE, MAE, and loss curve analysis to identify optimal model configurations.

- Consumer Behavior Analysis for Credit Card Application Approval, Revou**

Sep 2024 – Jan 2025
- Analyzed consumer behavior using SQL and Python to support approval decision-making and risk assessment.
 - Built interactive Tableau dashboards using Kaggle data to visualize trends and enhance data storytelling.
 - Conducted fraud detection analysis on credit card data to identify high-risk behavioral patterns.
 - Derived behavioral risk indicators to support strategies aligned with banking compliance and risk management.

LEADERSHIP & VOLUNTEER EXPERIENCE

- Honored Guest, Special Olympics World Games, Berlin**

Jun 2023
- Supported Indonesian delegation of 20+ athletes and staff, orchestrating international travel, accommodation, and on-site logistics to ensure 100% on-time participation.
 - Coordinated schedules and communications between athletes, delegation leaders, and event organizers, enabling smooth operations across 5 competition days.

- Volunteer, Social Media & Community Engagement, AIESEC, Morocco**

July 2018 – Sep 2018
- Led digital campaigns and community partnerships with NGOs, small businesses, and local leaders to boost project visibility.
 - Aligned outreach with UN SDG 17, promoting local initiatives and fostering cross-sector collaboration that engaged 50+ community members.

CERTIFICATION

Cloud & Data Engineering Certifications

- | | |
|--|----------|
| • Data Engineering on AWS , AWS | May 2025 |
| • Planning Large Scale Data Migration to AWS , AWS | May 2025 |
| • Sustainability Strategies with Generative AI , AWS | May 2025 |

Data Analytics & Visualization Certifications

- | | |
|---|----------|
| • Full-stack Data Analytics , Revou | Feb 2025 |
|---|----------|
